

For easy WiFi connectivity.

Watchguard 2020™ Wireless WiFi Alarm Pack

Model: ALC-PACK2

The Watchguard 2020™ Wireless Wifi Alarm System comes with a sleek modern design and a user-friendly front panel that supports WiFi networks. It will notify you via the smartphone app upon detection of intrusion or abnormalities. You can interact with the system via a paired remote control or its user friendly iOS or Android smartphone app.

A hand holding a smartphone displaying the Watchguard app interface. The screen shows several circular icons for different system functions like 'Armed', 'Disarmed', 'SOS', and 'Settings'.

The Watchguard 2020™ Wireless Wifi Alarm System works with a wide range of wireless, battery-powered sensors and accessories that are easy to set up and operate, so you can scale up or down the system based on your specific residential or security needs. Up to 30 sensors and accessories can be installed.
