

Bluetooth® Reconnect.

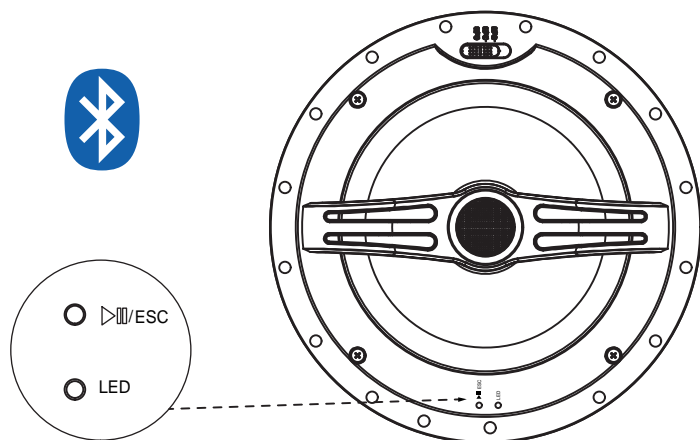

If you have Bluetooth reconnect issues, then cycle the power of the speaker: Using the supplied remote button, switch the unit off for 5 seconds and then switch the unit back on and wait for the speaker to tone and then reconnection should occur.

If not, recheck the phone's bluetooth connection, cycle it on/off and repair.

The button on the speaker is not necessary for pairing or repairing or general operation.

RF Remote Power Switch

BUTTON:

The button next to the LED on the Accento-Dynamica fascia is intended for installation servicemen to test for successful connections and is not required for general operation. If currently paired (LED is BLUE) then:

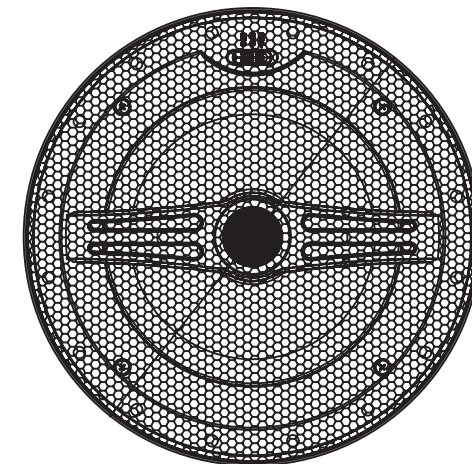

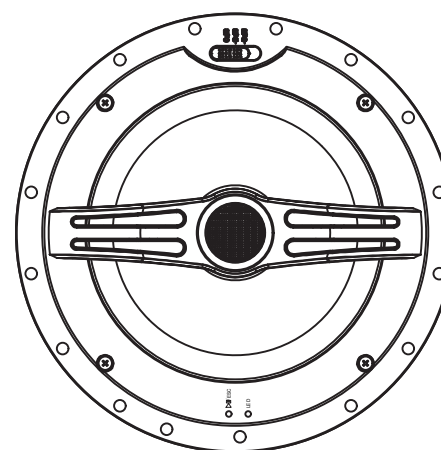

Short Button Press: will pause playback, press again commences playback.

Long Button Press: will disconnect the current Bluetooth® connection, and the unit is ready to pair again. LED is RED (See pairing instructions).

Instruction Manual

Amplifier RMS:50W X2
Amplifier Maximum Power:100W X2
AC 240V IN, DC 24V 2.5A OUT
Bluetooth® VER4.1+EDR
Distance 10M

WELCOME:

Thank you for your purchase of the Accento-Dynamica Bluetooth® Ceiling Speaker. Operation is completely hands-free and pairing is easy with no pass key required. Once power is connected, simply pair and stream. The pairing name is "ACCENTO".

OPERATION:

Connect the supplied power pack to the supplied remote power switch module in-line. Connect the module DC Plug to the speaker. Power on the power pack and then activate power by pressing the remote button. The speaker should make a chime.

LED Blinking RED:

The unit will amplify LINE-IN (requires line-level audio to be connected to the RCA inputs), and is ready and waiting for any device to connect to it via Bluetooth®.

Pair Your Bluetooth® device.

Turn on your Bluetooth® device and enable Pair to a new device. Pair to "ACCENTO"

LED Constant BLUE:

Indicates you are now paired. Speaker audio heard remains LINE-IN. Commence streaming from your paired Bluetooth® device.

LED Blinking BLUE:

Indicates the speaker is now streaming Bluetooth® audio from your device. Return to LINE-IN audio.

LED constant BLUE:

Still paired, but after several seconds of silence, will auto-switch to LINE-IN. To return to Bluetooth® streaming, press play on your Bluetooth® device.

End Session.

LED Blinking RED: If you disable your Bluetooth® device, pairing is broken, the ceiling speaker amplifier auto-switches to LINE-IN audio playback and the unit remains waiting for any Bluetooth® connection (See above).

Bluetooth® Interrupted.

If you leave the Bluetooth® reception area and the speaker loses signal, connection will automatically re-pair & resume once you return to the zone.

Bluetooth® Reconnect.

If you have Bluetooth reconnect issues, then cycle the power of the speaker: Using the supplied remote button, switch the unit off for 5 seconds and then switch the unit back on and wait for the speaker to tone and then reconnection should occur. If not, check the phone's bluetooth connection (cycle it on/off).
