

Part No: 02102 HF Unloaded Antenna

**(Suitable for manual and automatic tuning units
or direct use on 27 MHz Citizen Band)**

The model 02102 antenna is a rugged tapered Stainless Steel antenna built for use on both automatic and manual tuning units (& is ¼ wave on 27MHz). Its Heavy Duty Stainless Steel rod and robust fittings are designed to withstand rough environments.

The 02102 antenna radiating section is a Spring Hard, Ground & Polished 17/7PH tapered Stainless Steel rod.

Whip top and bottom fittings are constructed of Brass, finished in a Nickel Plating. The radiator is securely screwed into the base ferrule.

The antenna can be used on Spring Model 02750B in combination with Mobile Base Model [02733](#) (these items are sold separately, or complete kit [02102K](#)).

Model	Length	Rod Diameter	Weight	Termination	Construction
02102	2.605m	Base 5.0mm Tip 2.55mm	400g	1/2" BSW Male Thread	Spring Hard Ground & Polished 17/7PH Stainless Steel
