

Storage Solutions Rock-N-Roller Carts

ROCK N ROLLER®

One Cart.
8 Different Configurations.
Endless Possibilities.

Move All Your Gear In One Trip!

RocknRoller® MULTI-CARTS UNIVERSAL TROLLEYS

ARE THE WORLD'S MOST INNOVATIVE TRANSFORMABLE UTILITY CARTS

Rock-N-Roller® Multi-Cart® is the leading innovator and manufacturer of uniquely transformable utility carts. Each Multi-Cart model transforms into 8 different configurations, replacing the need for multiple carts for different uses. Multi-Carts® are designed for efficiency and reduce time and effort moving gear or equipment by 50% or more. Rock-N-Roller® Multi-Carts® are used by musicians, major TV networks, news crews, sports teams, Fortune 500 companies, material handlers, tradesmen and more.

- Instantly transform into 8 different shapes replacing 8 different cart types
- Huge load capacity but folds small for storage
- Featured in college engineering textbooks for outstanding design
- Lightweight, rugged and ergonomically efficient
- Designed to work with vehicles, planes & trains
- Winner of Accessory Of The Year Awards
- Reduces time and effort moving equipment by 50%
- Designed for professionals where speed and efficiency are crucial
- Numerous accessories available, Shelves, Bags, and spare parts
- Award-winning patented design
- Lightweight with rugged steel frame
- No removable pins to lose
- Caster brakes assist loading on inclines
- Tough, eco-friendly textured powdercoat finish
- Non-skid frame bed surface resists load slippage
- Expandable frame adjusts to load size and shape
- Foldable sides rotate & lock into place via release cables
- R-Trac wheels feature pneumatic-like ride, light weight, low rolling resistance and no air loss (and available as a spare part)
- Stairclimbers ease loads over stairs and curbs

RocknRoller MULTI-CART R14G MEGA GROUND GLIDER

SUITS R14 315kg

If load capacity is your priority, the RocknRoller R14G "Mega Ground Glider" is the industrial strength, heavy-duty workhorse you need. Featuring thicker tubing, and capable of holding up to 315kg, the R14G can expand to a massive 1.5M length, with a 0.38M wide frame bed that increases load stability with stacked cargo. In fact, the R14G can carry 20% more cubic weight than an R8 or R10. Rugged, foam-filled no-flat 200x76mm rear wheels and 150x76mm front casters come standard. The R-Trac® tyres ride smoothly with excellent traction, similar to pneumatic tyres, but without the hassle of upkeep or repair. The patented 8-in-1 cart can transform easily to adjust to various load sizes, allowing you to move large amounts of gear in no time at all. The textured powder coated steel is durable and also reduces slippage during transport.

Load	Length	Width	Code
315kg	1067mm to 1524mm	381mm	R14G

RocknRoller MULTI-CART R18RT MEGA PLUS

SUITS R18 315kg

The R18RT "Mega Plus" offers the most impressive carrying capacity and load handling capability of the entire RocknRoller® Multi-Cart® line, and instantly transforms into any of 8 configurations to help you move massive amounts of equipment with ease. Super wide R-Trac 200x76mm front casters with brakes and 254x76mm rear wheels easily roll heavy loads over grass, dirt, and soft carpet. The custom-designed R-Trac Ground-Glider Wide wheels feature low profile no-flat tyres, lightweight but strong polymer hubs, low rolling resistance, pneumatic-like cushioning, vastly wider load dispersion over soft terrain, and look like racing wheels. 200x76mm brake casters are 50% wider than typical casters and R-Trac 254x76mm rear wheels are 33% wider to glide over soft terrain but keep the cart lower to the ground for better loading ergonomics and smaller storage size. 25% larger tubing on the frame bed and foldable handles is stronger for even bigger loads. Extremely tough textured powder coat finish survives thousands of trips. Non-skid frame bed surface resists load slippage. Now you can easily roll your gear across rough terrain - at a job site, backyard wedding, over gravel or grass, at an outdoor festival, sporting event, or just about any condition you can imagine.

Load	Length	Width	Code
315kg	1067mm to 1524mm	356mm	R18RT

RocknRoller MULTI-CART R16RT MAX WIDE

SUITS R16 270kg

The R16 "Max Wide" instantly transforms into any of 8 configurations. Super wide R-Trac 150x76mm front casters with brakes and 200x76mm rear wheels easily roll heavy loads over grass, dirt, and soft carpet. The custom-designed R-Trac wheels feature low profile no-flat tyres, lightweight but strong polymer hubs, low rolling resistance, pneumatic-like cushioning, vastly wider load dispersion over soft terrain, and look like racing wheels. The 150x76mm brake casters are wider than typical casters and R-Trac 200x76mm rear wheels are 33% wider to glide over soft terrain but keep the cart lower to the ground for better loading ergonomics and smaller storage size. 25% larger tubing on the frame bed and foldable handles is stronger for even bigger loads. Extremely tough textured powder coat finish survives thousands of applications. Non-skid frame bed surface resists load slippage. Now you can easily roll your gear over the grass at a backyard wedding, an outdoor festival, or sporting event.

Load	Length	Width	Code
270kg	864mm to 1321mm	356mm	R16RT

RocknRoller MULTI-CART R10RT MAX

SUITS R10 225kg

The RocknRoller® Multi-Cart® R10RT is outfitted with rugged, foam-filled no-flat 254x76mm rear wheels and 127x32mm front swivel casters that will allow you to move massive amounts of gear quickly and easily. The R-Trac® tyres ride smoothly with excellent traction, similar to pneumatic tyres, but without the hassle of upkeep or repair. The patented 8-in-1 cart can transform easily to adjust to various load sizes, allowing you to move large amounts of gear in no time at all. Extending from 864mm to 1321mm in length, the R10RT has a weight capacity of 225kg, but also folds small for storage or transport in a vehicle. The textured powder coated steel is durable and also reduces slippage during transport.

Load	Length	Width	Code
225kg	864mm to 1321mm	343mm	R10RT

RocknRoller MULTI-CART R12RT ALL TERRAIN

SUITS R12 225kg

The R12RT is the flagship of the RocknRoller® Multi-Cart® line, featuring rugged, foam-filled no-flat 254x76mm rear wheels and 200x50mm front casters that are designed to navigate just about any terrain, including gravel, grass, or other uneven surfaces with ease. The R-Trac® tyres ride smoothly with excellent traction, similar to pneumatic tyres, but without the hassle of upkeep or repair. The patented 8-in-1 cart can transform easily to adjust to various load sizes, allowing you to move large amounts of gear in no time at all. Extending from 34" to 52" in length, the R12RT has a weight capacity of 225kg, but also folds small for storage or transport in a vehicle. The textured powder coated steel is durable and also reduces slippage during transport.

90kg	991x368x629mm	RMH1

Shelves & Decks

QUICK SET LONG SHELF FOR R2 TROLLEYS

The Rock-N-Roller R2 "Quick Set" Long Shelf is designed to quickly transform your R2RT into a mobile workstation. Once the support posts are installed, the shelf can be installed quickly with a single wing bolt. The surface measures 927mm long x 400mm wide to provide ample work space for Mobile Sound, Film Production, Testing Equipment, and other professional on-site applications, as well as maximising gear transport efficiency. The support posts can also remain attached during storage, for quick on-site assembly and disassembly. The shelf is 13mm thick, supported by steel tubes, covered in heavy duty paint for durability, and is easily removed for storage and transport. Maximum recommended weight capacity 45kg.

Suits	Length	Width	Code
R2	927mm	400mm	R2LSH

Note: trolley not included

QUICK SET SHORT SHELF FOR R2 TROLLEYS

The Rock-N-Roller R2 "Quick Set" Short Shelf is designed to quickly transform your R2RT into a mobile workstation. Once the support posts are installed, the shelf can be installed quickly with a single wing bolt. The surface measures 584mm long x 400mm wide to provide ample work space for Mobile Sound, Film Production, Testing Equipment, and other professional on-site applications, as well as maximising gear transport efficiency. The support posts can also remain attached during storage, for quick on-site assembly and disassembly. The shelf is 13mm thick, supported by steel tubes, covered in heavy duty paint for durability, and is easily removed for storage and transport. Maximum recommended weight capacity 45kg.

Suits	Length	Width	Code
R2	584mm	400mm	R2SSH

Note: trolley not included

QUICK SET SHELF FOR R8, R10, R12 TROLLEYS

The Rock-N-Roller Quick Set Shelf is designed to quickly and seamlessly transform your R8, R10, R11, or R12 cart into a mobile workstation. Once the 4 support tubes are installed, the shelf sets up and comes apart in seconds, and can be stored with the support tubes installed, making on-site assembly and disassembly quick and easy. The surface measures 406mm wide, and can be configured at a short 813mm length or a full 1270mm length, to provide ample work space for Mobile Sound, Film Production, Testing Equipment, and other professional on-site applications, as well as maximising gear transport efficiency. The shelf is 13mm thick, supported by steel tubes, and covered in heavy duty textured paint for extra durability. Maximum recommended weight capacity is 68kg. Shelf kit includes shelf, 4 support tubes, and 4 mounting bolts.

Suits	Length	Width	Code
R8, R10, R12	813-1270mm	406mm	RSH10Q

Note: trolley not included

QUICK SET SHELF FOR R6 TROLLEYS

The Rock-N-Roller Quick Set Shelf is designed to quickly and seamlessly transform your R6 cart into a mobile workstation. Once the 4 support tubes are installed, the shelf sets up and comes apart in seconds, and can be stored with the support tubes installed, making on-site assembly and disassembly quick and easy. The surface measures 406mm wide, by 1000mm length, to provide ample work space for Mobile Sound, Film Production, Testing Equipment, and other professional on-site applications, as well as maximising gear transport efficiency. The shelf is 13mm thick, supported by steel tubes, and covered in heavy duty textured paint for extra durability. Maximum recommended weight capacity is 68kg. Shelf kit includes shelf, 4 support tubes, and 4 mounting bolts.

Shelves & Decks

2 TIER MULTI MEDIA SHELF FOR R8, R10, R12 TROLLEYS

The Multi-Media shelf is designed to transform your Rock N Roller cart into a fully functional mobile workstation. The Large main shelf measures 610x787mm to provide ample work space for Mobile Sound, Film Production, Testing Equipment, and other professional on-site applications. The main shelf sits 559-610mm from the top of the cart frame and 832-883mm from the ground. The upper shelf sits 305mm above the main shelf, can hold up to 22.7kg, and measures 254x787mm, allowing additional equipment to be set above the main workspace. The combined shelves can handle a total load of up to 90kg. Both shelves are covered in a heavy duty carpet for durability, and fold for easy storage and transport.

The Multi-Media shelf fits models R8, R10, R12.
