

PT0811 Appliance Surge Protector With EMI/RFI Filtration

This product is ideal for use with whitegoods such as refrigerators and washing machines that include microprocessors as well as computer systems and home entertainment systems to protect them from these harmful power surges. In addition to surge protection, this product also includes EMI/RFI filtration to remove line noise that can cause appliances to not operate correctly. Indicator status lights are included to show the status of the mains power supply and surge protection.
