The Silcron SLR07 Wireless Active Bookshelf Speakers with HDMI ARC - the pinnacle of audio engineering that redefines your listening experience. With a commanding 120W RMS output, these speakers deliver a powerful and immersive sound that transforms your space into a sonic haven.

Equipped with a 2.0-channel configuration, the Silcron SLR07 ensures a dynamic audio experience, enhancing both music and movie playback. The speaker unit features a pair of full-range 6.5-inch drivers for robust lows, complemented by twin 1-inch tweeters that deliver crisp highs, creating a harmonious blend across the frequency spectrum.

Versatility meets convenience with a multitude of input options. Connect seamlessly via Bluetooth 5.0, RCA, optical, coaxial, USB, or HDMI; the latter is perfect for elevating your home theatre setup. The inclusion of bass reflex tubes ensures deep and resonant bass response, providing a balanced and rich soundstage.

Experience total control at your fingertips with adjustable volume, treble, and bass settings, giving you the power to customise your audio to perfection. The integrated DSP offers distinct audio modes for movies, music, and news, adapting the sound profile to suit your content.

Crafted with precision, the Silcron SLR07 Hand-made superior wooden housing and fabric cloth, ensuring durability without compromising on aesthetics. The IR remote control, rotary knob, and buttons provide multiple avenues for effortless control, allowing you to fine-tune your audio experience with ease.

Immerse yourself in the world of distortion-free sound, as the Silcron SLR07 boasts a distortion level of less than 1%. With a frequency range spanning from 30Hz to 30kHz and an impressive signal-to-noise ratio of >80dB, these speakers capture every nuance of your audio content. Elevate your audio setup with the Silcron SLR07 Wireless Active Bookshelf Speakers - where power, precision, and versatility converge for an unparalleled listening journey.
