

WM-2000R

SONKEN WIRELESS MICROPHONE

Rear View

DESCRIPTION:

WM-2000R is dual transmitter operation with front mounted antennas.

Receiver features : Antenna A/B, RF and AF signal LED indicators, channel selector, power on /off switch and audio level control conveniently located on the front panel for quick visual operation checks.

Surface Acoustic Wave (S.A.W.) filter circuitry for Radio Frequency Interference free operation.

Noise Squelch Circuitry: auto analyses signal quality and prevents the occurrence of noise bursts.

Handheld Mic transmitter features: Low Battery indicator light on the transmitter, changeable microphone capsule heads allowing quick & easy field replacement in a snap.

Audio Outputs: Balanced XLR output and unbalanced 6.3mm (1/4") output jacks.

1/2 wave tuned antennas for the most stable RF reception.

Rack mountable compact 1/2-rack space design

Optional accessories: 16 ch body pack with headset / lapel mic.

FEATURES:

WM-2000R is dual transmitter operation with front mounted antennas.

Receiver features :

Antenna A/B, RF and AF signal LED indicators,

channel selector, power on /off switch and audio level control conveniently located on the front panel for quick visual operation checks.

PLL synthesized technology with 16 selectable UHF channels for receiver channel A & B.

Diversity Twin Antenna technology prevents RF dropouts.

Surface Acoustic Wave (S.A.W.) filter circuitry for Radio Frequency Interference free operation.

Noise Squelch Circuitry: auto analyses signal quality and prevents the occurrence of noise bursts.
