

Powerful Mainstream Solution with High Speed AC1300 Wave 2 for Modern Business

CAP1300

2 x 2 AC1300 Wave 2 Dual-Band Ceiling-Mount PoE Access Point

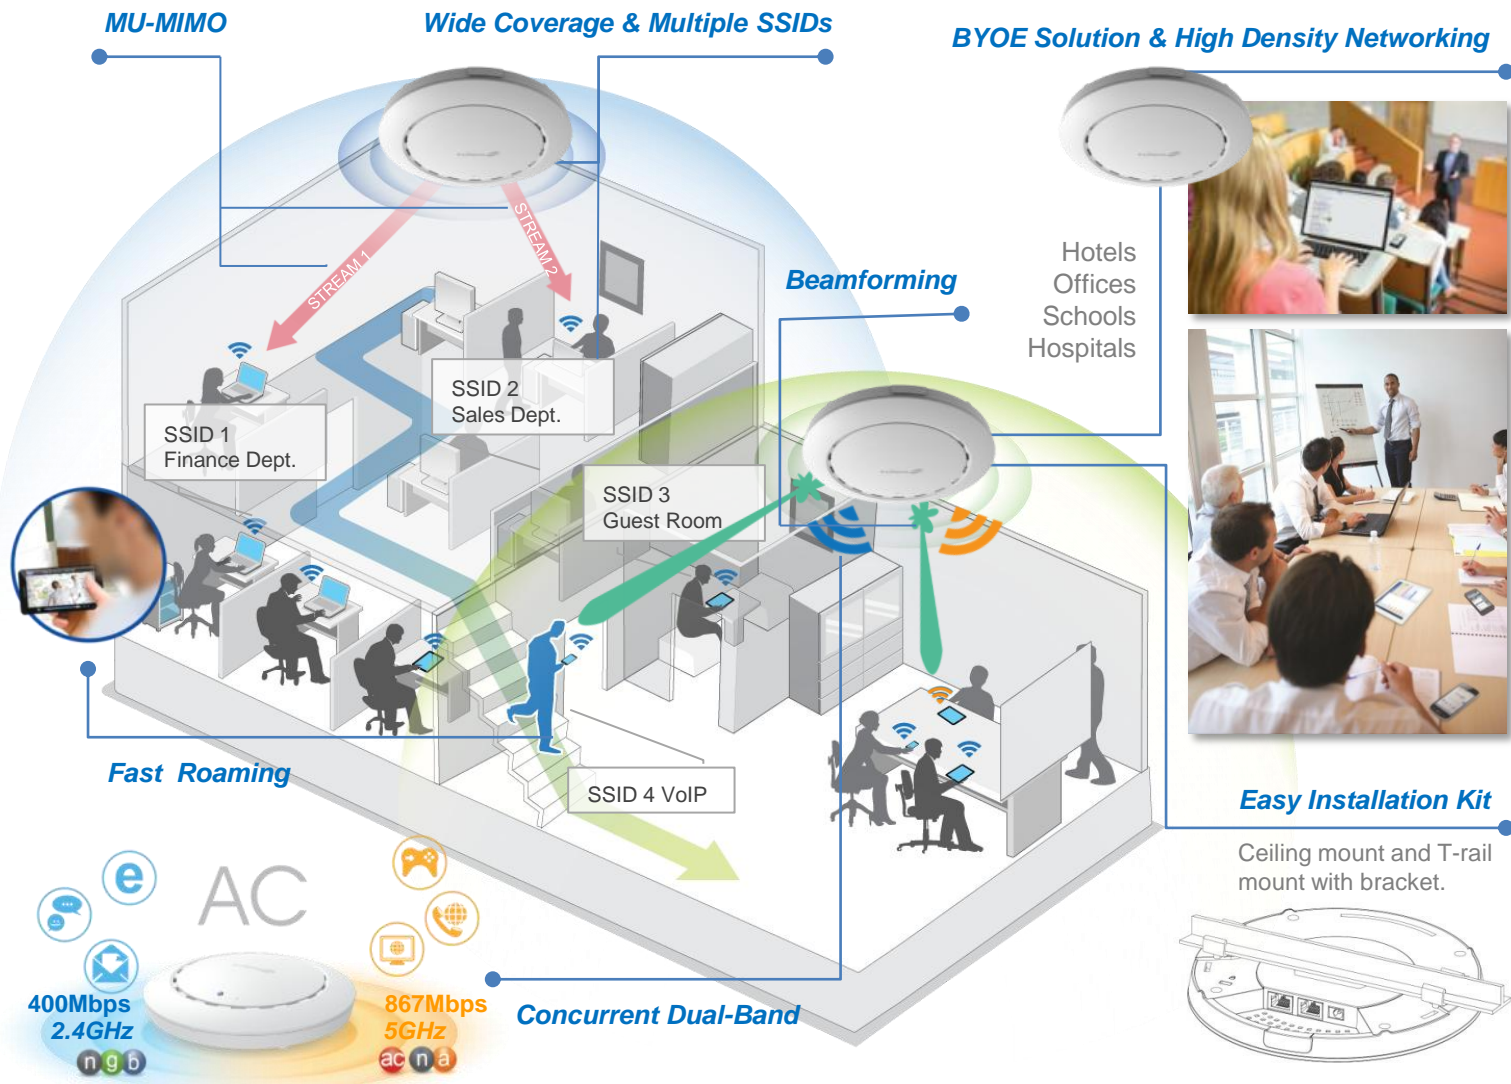

KEY FEATURES

- **802.11ac Wave 2 High Speed Dual-Band:** IEEE 802.11ac concurrent dual-band with 1300Mbps (2.4GHz at 400Mbps and 5GHz at 867Mbps) wireless speed.
- **Efficient MU-MIMO:** Serves multiple devices simultaneously to enhance connected devices capacity.
- **High Performance Wi-Fi:** Beamforming improves Wi-Fi performance with targeted, directional signals for better range and reliability. AirTime Fairness (ATF) optimizes the Wi-Fi speed among each clients and eliminates Wi-Fi lag. Band steering balances channel utilization, enabling high capacity environment .
- **Compact & Durable Housing:** Ultra slim design with UL94-5VB flame-retardant plastic housing
- **Designed for High Density Usage:** Supports up to two hundred users simultaneously (one hundred users per band), ideal for crowded environments and BYOE (Bring Your Own Everything) workplace Wi-Fi connection.
- **Multiple SSIDs for Security Management:** Supports up to 32 SSIDs (16 x 2.4GHz & 16 x 5GHz) ideal for multiple departments, user groups, customers or guests.
- **802.11r/k Fast Roaming:** Roams smoothly between APs without lag or interruption, ensuring top performance for video and voice streaming applications.
- **Wide Coverage & High Sensitivity:** Adjustable RF output power and high receiver sensitivity for wide coverage across large spaces.
- **Power over Ethernet:** Supports IEEE 802.3af PoE as well as included power adapter.
- **Built-In RADIUS Server:** With management for up to 256 user accounts.
- **Business Environments:** Advanced choice for high-performance applications. Suitable for a wide range of commercial applications such as offices, hotels, meeting rooms, schools, campuses, resorts, retail and others.
- **Central Management:** Edimax Pro Network Management Suite (NMS) and SKYMANAGE PC for easy and Intuitive web-based central management. AP built-in with NMS supports AP array architecture.

The CAP1300 is a powerful wireless solution designed to meet the needs of modern mainstream businesses with the latest IEEE 802.11ac Wave 2 technology for dual-band wireless speeds up to 1300Mbps. Featuring with MU-MIMO (Multiple User – Multiple In Multiple Out) enhanced devices capacity and Beamforming, AirTime Fairness, Band Steering improved Wi-Fi range, reliability and performance. Industrial-grade performance and build quality combined with user-friendly operation, super-fast wireless speed, an extensive feature set and a practical, ceiling-mount design make an ideal solution for enterprise environments.

For businesses that demand security, flexibility and speed – the Edimax Pro series has a wide range of potential applications from office environments to schools, campuses, hotels and hospitals. High-density capacity for up to 200 simultaneous users, is ideal for BYOE workplaces or other environments with a high volume of users and wireless devices. Multiple SSIDs can be configured for different departments or user groups and a built-in RADIUS server provides additional verification with a scalable AP array architecture for central management of multiple access points. 802.11r/k Fast Roaming for seamless transitions between access points, Power over Ethernet support (PoE) and an intuitive web-based management interface provides flexibility for deployment and extensive management options for company MIS departments and network administrators.

When performance and security are critical for your business, you need products that are engineered for your industry. The Edimax Pro series is designed to help your business and provide the connectivity that you rely on every day, with safety and effectiveness guaranteed.

Central Network Management: NMS & SKYMANAGE PC

Work with Edimax Pro NMS (Network Management Suite) * and SKYMANAGE PC* web-based wireless network management software. Company MIS administrators can plan and manage Edimax Pro access points' powerful functionality according to their office space using an easy, remote web-based interface which includes a dashboard, map view, traffic statistics and wireless client list for network-wide remote administration. RADIUS settings, WLAN group settings, access control, guest network settings and firmware upgrades can all be managed centrally from a single location to reduce network downtime, aid troubleshooting and optimize network performance. Graphical zone plans with Google Maps integration and setup wizards are also available for expanding and managing large networks with multiple access points, with custom floor plans, visual overviews and easy drag-and-drop icons for quick access to key performance and monitoring information.

*NMS is built-in with Edimax Pro CAP, WAP series & OAP1750 access point. For SKYMANAGE PC, please contact Edimax authorized distributors or SIs to download the software.
