

Smart Plug Switch with Power Meter Intelligent Home Energy Management

SP-2101W V3(AUS)

FEATURES

- Real-time power meter. Easily check the current power usage with the intuitive EdiSmart App on your mobile device
- System integration capable. Made to be integrated into other projects with ease, also providing API for customization.
- Work with Amazon Alexa voice services.
- Easy Setup. Just plug it into the wall socket, connect to the home network and you are good to go.
- Ultra-compact and slick design built from the ground up.
- Made for a safer environment. Withstands a wider range of temperatures and is also surge protected.

OVERVIEW

The Edimax Smart Plug Switch with Power Meter connects people to their homes and the things they use every day. Designed to make homes more dynamic, functional and work better for modern Lifestyles. Smart Plug products give users intelligent control over all of their home electronics.

The Smart Plug Switch with Power Meter plugs into any wall socket and enables you to switch a connected electronic device on/off from your smartphone. The embedded power meter allows you to monitor power usage. Just plug an appliance into the Smart Plug Power Meter and see how this smart device can work for you and your home.

Real-time Power Meter

Ever wonder what is the current power usage? View the current kWh to know exactly what the plugged in device is costing you or if the device is functioning properly as it should. Compare different devices to have a better grasp of where your money is spent. The monitoring function is done through the intuitive App.

Work with Alexa. Ask and Receive.

Let your voice control your lamps, electric kettles, fans, Christmas tree lights, and more. Just plug an appliance into the Smart Plug Power Meter and see how this smart device can work for you and your home.

Easy Setup

Installing the smart plug is that easy and safe. Just plug it into the wall socket and then connect it to your home network. Control all your EDIMAX smart plugs using the intuitive EdiSmart App on your mobile device. It is easy as that! In addition, the max rated power support means that you can plug a wider range of devices.

Made for a Safer Environment

Made to withstand harsher temperatures. Expect a range of -20°C–50°C temperature safety. In addition to surge protection, it is designed to be that much more durable and safe.

Ultra-compact and Slick Design

Compared to other smart plugs, EDIMAX has created a very slick, modern and compact plug. Integrate the plug into your home without hassle. Plug it into the wall socket and let it take care of the rest.

Seamless System Integration

Made small, simple and easy. Able to be used for system integration, such as providing the API for customization and more.
