

## The intelligent Doorbell

- Speak to the person at your door via your landline or mobile phone
- Leave your home, office or business - never miss another delivery or visitor
- A great security product - speak to any visitor without opening the door
- Answer and offer reassurance to a relative's visitor remotely
- Deter potential intruders - are you in or out?

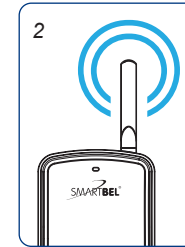

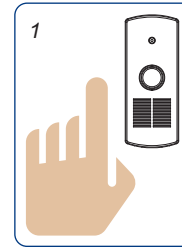

## Where is it used?

- Businesses and home based businesses
- Domestic and home users
- Hotels, Bed and Breakfast, Guesthouses and Hostels
- Doctors, Dentists, Vets and other Out of Hours Services
- Nurseries, Schools, Colleges and Universities
- Nursing homes, Hospitals and Residential care
- Tourist Information and Taxi firms
- Warden controlled accommodation

## How does it work?

1. Visitor presses Doorbell
2. Smartbel simultaneously calls the number you set
3. Answer the phone and speak to the visitor remotely

## How do i program the Smartbel?

Programming the Smartbel to ring any number you choose is simple:

1. Note down the number of the micro SIM card you wish to use inside the Smartbel. The unit is unlocked so any micro-SIM with credit will do.

Let's call this the **Smartbel number**

2. Write down the mobile phone or landline phone number you want Smartbel to call when someone presses the Doorbell.

Let's call this the **Callback number**

To set the number your Smartbel calls, you will need to send a text message to the **Smartbel number**:

**!@Callback number@**

Shortly after sending the text, you will receive a text message confirming that everything is set and you are ready to start using the Smartbel:

**SMARTBEL: on, Signal: 23/25 strong :-D**
