

PLI-4052 Version: 4

500Mbps Powerline Adapter

The LevelOne PLI-4052 500Mbps Powerline Adapter allows you to build a powerful and clutter-free network without breaking the bank. The latest HomePlug AV technology enables a data transmission via existing electrical wiring instead of messy network cables. Simply plug PLI-4052 adapters into wall sockets without any configuration, and a stable powerline network will be ready with incredible ease.

Key Features

- Extends your home network through existing electrical wiring with data transfer speeds of up to 500Mbps
- Security push button for software free configuration
- Simple Plug and Play installation
- Compact, lightweight design

Specifications

System Specifications

Standards & Protocols:

IEEE 802.3 10-BASE-T (Ethernet)

IEEE 802.3u 100-BASE-TX (Fast Ethernet)

IEEE1901/ HomePlug AV

Port:

1 x 10/100Mbps RJ-45 port

Button/Knob:

Reset

Indicator:

Power

Link

PLC

Power Input:

100-240V ac

Power Output:

12V DC

Power Consumption:

?4W

Modulation:

OFDM

Bandwidth:

500Mbps

Data Transfer Rate:

500Mbps over Powerline; 10/100Mbps over Ethernet

Performance

Operating Distance:

Powerlines - up to 300m

Environment

Power Saving:

?4W

Temperature (°C):

0??40?

Humidity (Non-condensing):

10%?90% RH

Physical Specifications

Dimensions (W x D x H mm):

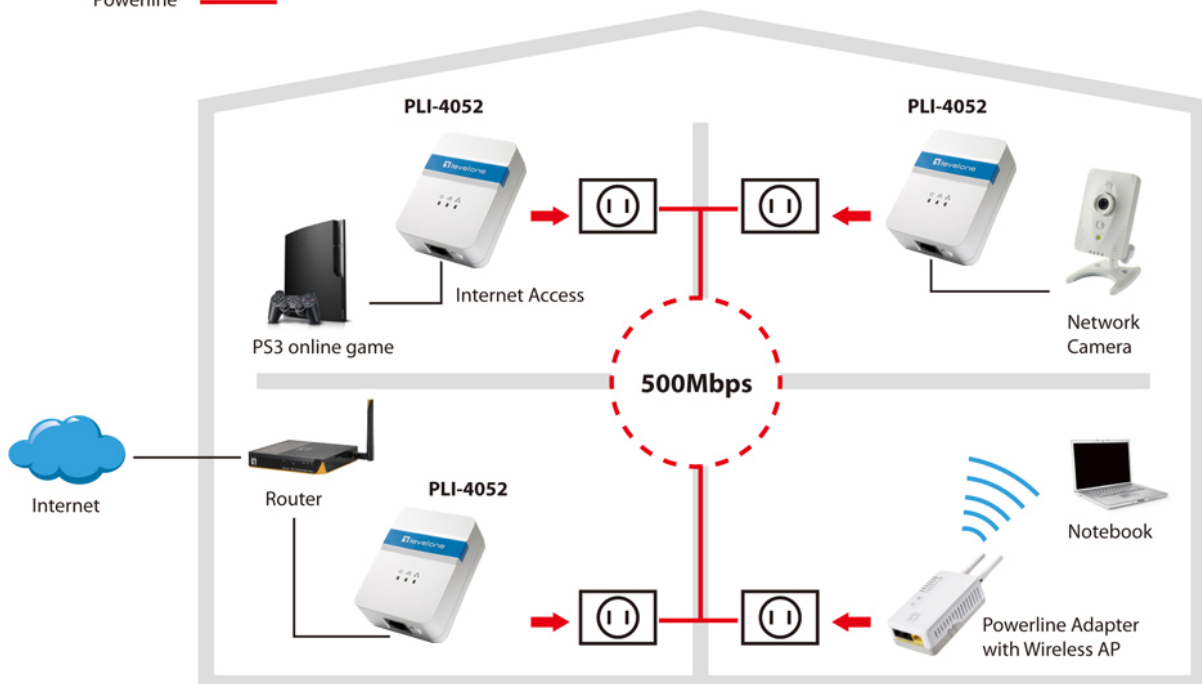

75*54*34mm

Weight (g):

130
