FEATURE OVERVIEW

<p>8Core GPU & QUAD Core CPU Fast Processor & memory designed for video</p> <p>With a Quad core 2Ghz processor & 8GB storage/2GB flash of processor memory, movies will play smoothly & load faster</p>  <p>8G Flash 1G Ram</p>	<p>4k Ultra HDR resolution ready</p> <p>Stunning clarity, vivid colour and sharp detail will make the best of new generation UHD TV's, Full HD 1080p also looks great.</p> 
<p>Digital Surround Sound</p> <p>All sound formats from 2 channel stereo to 7.1 Dolby and DTS. Also Flac lossless HD audio is supported.</p> 	<p>3D ready*</p> <p>Watch eye popping 3D content from files (like BDMV / 3D BD-ISO or streamed 3D movies)</p> 
<p>High Speed LAN</p> <p>With up to 100MB lan fast data transfer, wait times for movie buffering are a thing of the past</p> 	<p>Android OS Smarts</p> <p>Android opens a world of possibilities through the Google Play store. Games, video players, apps, utilities and lots more.</p> 
<p>USB Ports & Micro SD input</p> <p>Connect USB flash drives, hard drives or input devices like mice, keyboards or web cams or read content from a Micro SD card.</p> 	<p>HDMI or Analogue AV output</p> <p>Connect to older TV's via Composite video and L/R stereo (cable included) or connect to new TV's with HDMI for the ultimate in sound and vision.</p> 
<p>Wireless Connectivity</p> <p>Wifi and Bluetooth on board means that you can connect to wireless networks or connect wireless products to the media player</p> 	<p>Play it all -Multi source, Multi Format ready.</p> <p>Whether it's 4K movies from Netflix®, Youtube® videos online or movies/music from your home network or USB storage drive, with KODI and other media players file playback is assured*</p> 
<p>Miracast ready</p> <p>Share your tablet or smartphone screen onto your TV for everyone to see. (it's like HDMI only wireless)</p> 	<p>AirPlay: Developed by Apple, this app allows wireless streaming between devices of audio, video, device screens, and photos, together with related metadata.</p> 

Note: Although this android Media Player can support all the above features, you must have the correct hardware and compatible video files. For example, if you would like to playback a 3D movie you must have a 3D TV and a 3D movie file first, in order for this feature to work correctly.

CALIBRATING THE AIR MOUSE

If your screen air mouse pointer does not line up accurately on your TV screen you may need to calibrate your air mouse. In this case, center the air mouse pointer (cursor) in the middle of your screen as best you can. Press the calibration button which will turn the pointer off and stop it from moving. Align your air mouse (remote) to the center on the screen again, then press the calibration button again to turn your air mouse pointer back on again. Repeat the process as required.

FAQ

Some apps I downloaded are not working properly. Why?	They may have not installed correctly. Please uninstall the apps and reinstall them again.
My remote control is not working. Why?	Make sure the batteries are installed correctly. Try a different set of batteries. <i>Please note: Some apps will not work correctly with a remote. A mouse may be required for use.</i>
The new app I installed takes a long time to open. Is this normal?	News Apps may need a little more time to set up when first installed. If your app takes a little longer than usual to start, try closing the app and reopening it in a few mins. In most cases this will allow the app to setup in the background and to open correctly.
I cannot connect with my WiFi network	First go to the Advance settings and ensure Wifi is turned on. Then check available WiFi networks. You can also click the WiFi icon from the main screen if you have already turned on your Wi-Fi.
Why can't I see my screen pointer?	Please ensure that you have 1) plugged in your screen pointer dongle, 2) adjust the screen pointer location by using the calibration button, 3) check that you have selected RF from your remote control
