Programming SeKi One

Step 1

To program the SeKi One, press the "On / Off" and "Vol +" buttons simultaneously and hold down these two buttons for 5 seconds. Release the buttons when the LED starts to light continuously. The SeKi One is now in learning mode.

Step 2

Hold both remote controls so that the transmitting end of the previous remote will point to the receiving end of the SeKi One. (Distance 2-5 cm)

Step 3

Press the button to be programmed on the SeKi One remote control. The LED flashes to confirm and awaits the signal from the original remote control.

Step 4

Now press the corresponding button on the original remote control. When correctly received, the LED flashes three times briefly and then lights up.

Step 5

To learn other buttons repeat steps 3 + 4 until the end of all learning.

Step 6

When all buttons have been programmed, first press the "on / off" button and the "VOL" button at the same time to complete the learning process. If no key is pressed within 15 seconds during the learning process, the process is saved and terminated.

Now your SeKi One is ready for use!

Speedy, easy,
kids friendly, intelligent

OneKey Duplication SeKi One

Step 1

Insert batteries into both SeKi One remote controls. **Remote A** is the already trained SeKi One, **Remote B** is the still "empty" SeKi One.

Step 2

Start with the **Remote B**: Press and hold the "On / Off" and "CH-" buttons simultaneously for 5 seconds. Release them when the status LED is lit. The learning mode is now active.

Step 3

Hold both remote controls so that the transmitting end of the previous remote will point to the receiving end of the SeKi One. (Distance 2-5 cm)

Step 4

On the **Remote A**, press and hold the "On / Off" and "CH +" buttons simultaneously for 5 seconds. Release the two buttons when the **Remote A** status LED is lit.

Step 5

When the status LEDs of both remote controls start flashing, the programming is transmitted. If the indicator light of the two remote controls flashes three times and then goes off, copying is completed.

Both SeKi One remote controls now have identical codes and are ready for use.
