

# THINKWARE

The World's Leading Dash Cam Brand

2026 CATALOGUE

[thinkware.com.au](http://thinkware.com.au)

**THINKWARE DASH CAM™**

# Your trusted companion on the road

You never know when you might find yourself involved in a motor vehicle incident. Driving is unpredictable, and safety is never guaranteed.

**On average, 90% of road accidents are caused by human error, with driver carelessness being a significant factor.**

In the unfortunate event of an accident, the situation can be incredibly stressful, making it difficult to recall crucial details. That's where a dash cam comes in — acting as your reliable witness and protecting you from the financial burden of liability. With a dash cam, you can drive with peace of mind, knowing there's always a dependable, silent witness by your side.

## Capture the Extraordinary

The road is full of unexpected moments, and your dash cam is always ready to capture them. With built-in manual recording mode and still-image capture, you can document those once-in-a-lifetime events, whether it's a breathtaking meteorite or a family of deer crossing your path. Share these extraordinary moments with your friends and turn the ordinary into something remarkable.

# THINKWARE DASH CAM™ Accessories

## Power Cable

Provides a clean power solution to your Thinkware dash cam via vehicle's 12V outlet, OBD port or directly to the fuse box.

12V Power Cable  
12VCC

Hardwire Power Cable  
HWC

OBDII Power Cable  
OBDTH01E

## GPS Antenna

Location and speed are tracked and embedded onto footage directly. Data can then be reviewed on PC / Mac Viewer.

GPSANT

Compatible models: F70Pro, Q200 and ARC

## Polarising Filter

Eliminate lens flares, light reflections and windshield glares and corrects overexposed footages.

CPLFLTR

Compatible models: All Thinkware Dash Cams

## Rear Camera

Designed to provide rear coverage, the rear camera accessory is intended to be installed on the rear windshield.

U3000RC Compatible model: U3000

U4KRA Compatible model: U1000  
Q1000RA Compatible model: Q1000

U1000RC Compatible model: U1000 PLUS

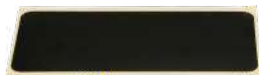

## Heat Block Film

Deflects direct sunlight. Helps minimize heat transfer from windshield to dash cam's body.

U3000HBF  
W: 25mm, L: 80mm

Compatible models: All Thinkware Dash Cams, Best suited for U3000

Q1000HF  
W: 50mm, L: 100mm

Compatible models: All Thinkware Dash Cams, Best suited for Q1000

## Micro SD Card

Enable high speed data transfer up to 100MB per second.

SNV 4.0 (Parking and Driving Mode – Record Low Light Condition by SHCG; Super High Control Gain)

Energy Saving Mode: Energy Saving 1.0 (Up to 2.5 days / 62 hours), Energy Saving 2.0 (Up to 24 days / 576 hours)  
Energy Saving Mode standby time is based on 4,500mAh External Battery (iVOLTMN)

# THINKWARE DASH CAM™ Mobile Apps

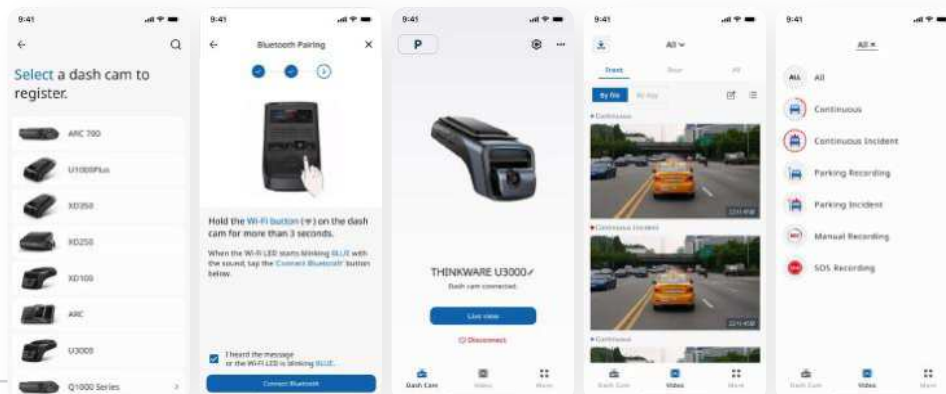

## Thinkware Dash Cam Link App

Compatible models: F70PRO, F200 PRO, Q200, Q1000, U3000, U3000 Pro, U1000 Plus, ARC, M1

## Thinkware Dash Cam Link App

Easily replay your latest driving videos and manage your dash cam settings on the go – all in one convenient app.

### Playback and Export Recorded Driving Videos

Effortlessly playback recorded driving videos on your device. You can also download and export these videos directly to your smartphone's camera roll, giving you quick and convenient access to your essential footage anytime, anywhere.

### Live View

Experience real-time footage from your Thinkware dash cam directly on your smartphone. Stream live video, monitor your surroundings, and easily adjust camera angles with the assistance of toggleable positioning lines for precise placement.

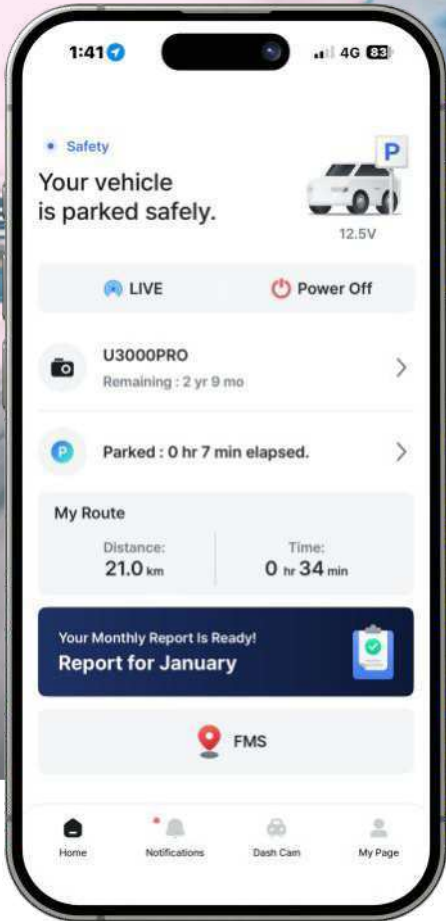

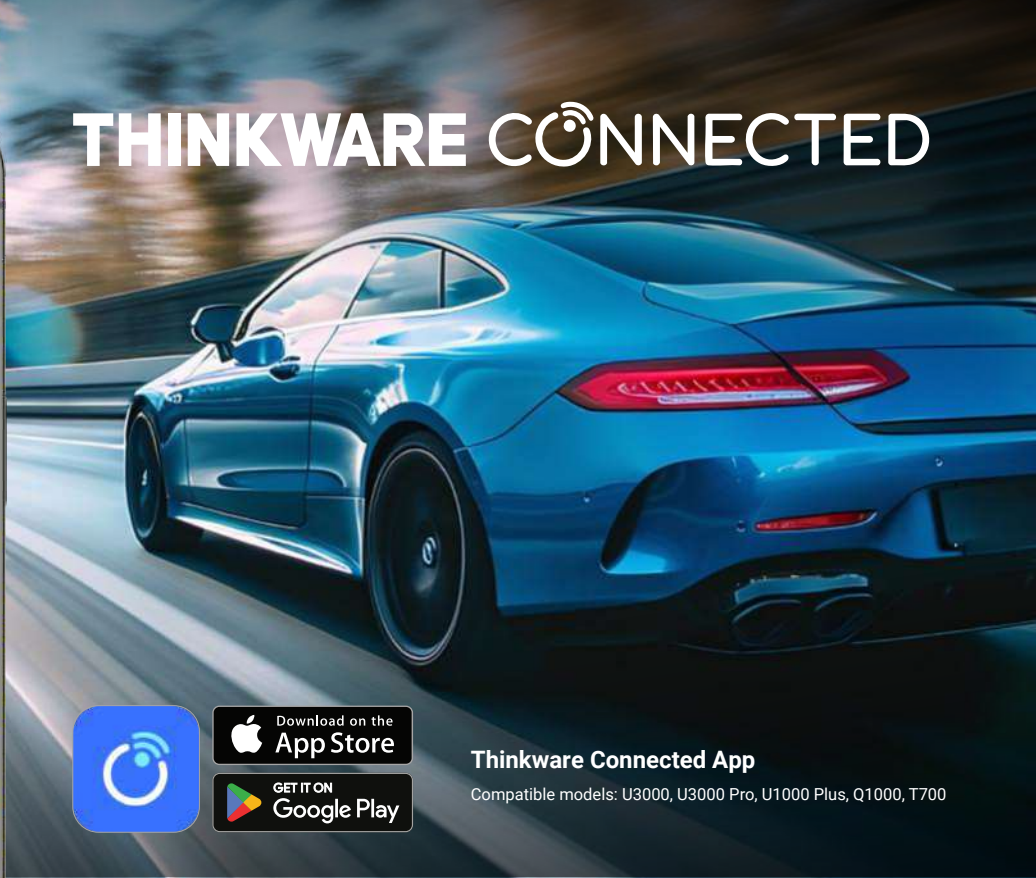

### Dash Cam Settings

- **Memory Card Settings:** Optimise your dash cam by formatting your MicroSD card and using memory partitioning to prioritise important footage for longer storage.
- **Record Settings:** Enable parking mode, adjust timing and voltage cutoff, and fine-tune G-sensor sensitivity to reduce false alarms and detect minor bumps.
- **System Settings:** Access system settings to disable the speed display and switch the speed unit.
- **Camera Settings:** Adjust video resolution, brightness, and rotate the rear camera if needed; manage parking mode to maximise card space for motion detection and incidents.
- **ADAS Settings:** Enhance safety with ADAS functions and Safety Camera alerts; configure activation speeds and set lane departure warnings.

\*For the Thinkware U3000, activate parking modes like motion and impact detection, Energy Saving mode, and RADAR.

\*Note: While you're going through the camera settings, the dash cam will not actively record. See recommended dash cam settings. Settings vary between dash cams

# THINKWARE CONNECTED

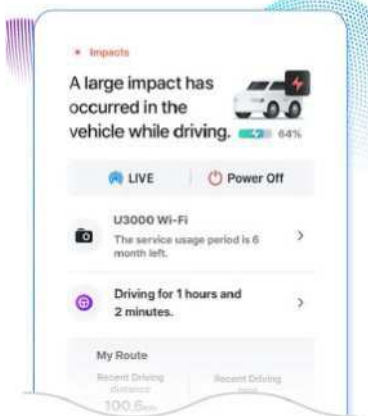

## Thinkware Connected App

Compatible models: U3000, U3000 Pro, U1000 Plus, Q1000, T700

Thinkware Connected is FREE to download and use with a compatible Thinkware Dash Cam. Connecting a dash cam to a mobile hotspot device or Wi-Fi network with internet access will consume data. Carrier / Service Provider charges may apply.

### Strong Impact Notifications

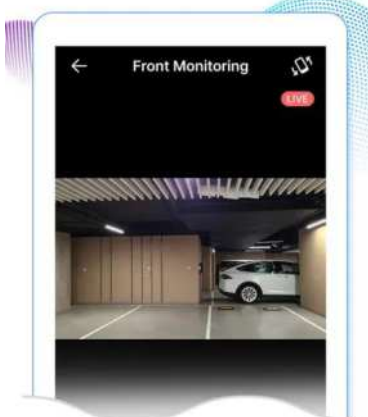

### Impact Notifications when Parked

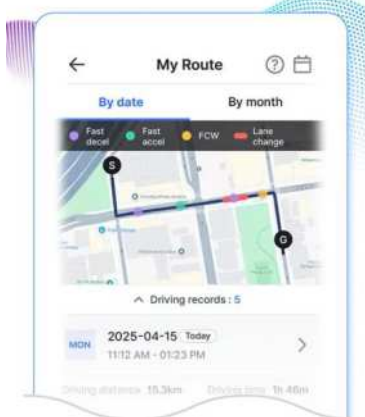

### Send Emergency Message

For U3000 PRO Users with the LTE Module

# Includes USIM + 3-Year Basic Service

Every LTE Module comes with a **USIM** and includes a **Basic Plan**, with a Premium trial during the first month. Users can upgrade to the Premium Plan at any time.

- ▶ **Introductory Benefit:** Included service for the first 3 years.
    - ▶ **Month 1:** PREMIUM Plan trial
    - ▶ **Months 2–36:** Automatically switches to Basic Plan
  - ▶ **After 3 Years:** Service ends automatically. To continue, you'll need to purchase a plan – there is no auto-renewal.
  - ▶ **Upgrading:** You may upgrade to the Premium Plan at any time during the Basic period via in-app purchase.
  - ▶ **Renewal:** All plans are fixed-term and do not auto-renew.
- Note:** To use THINKWARE CONNECTED with the U3000 PRO, the LTE Module is required. Wi-Fi hotspots and tethered mobile data connections are not supported for CONNECTED services.

OTA Updates		Not Supported	Firmware & Speed Cam Data
Device Limit Per Account		Up to 30 Dash Cams	Up to 100 Dash Cams

For U3000 / U1000 PLUS / Q1000 / T700

# 5-Year Included Basic Service

No USIM Required (Wi-Fi Connection Only)

- ▶ **Introductory Benefit:** Service is **included for the first 5 years**.
- ▶ **After 5 Years:** Service ends automatically. To continue, you'll need to purchase the WiFi / LTE plan – there is no auto-renewal.
- ▶ **Note:** To use THINKWARE CONNECTED with the U3000 / U1000 PLUS / Q1000 / T700, a mobile hotspot device or a Wi-Fi network with Internet access is required. Carrier/Service Provider charges may apply.

The smartphone used to set up the Internet connection on the dash cam cannot also be used as a mobile hotspot for the dash cam. A different hotspot device/smartphone is required.

SERVICE TYPE		WiFi / LTE PLAN
Service Period		Active during paid subscription
Emergency Contacts		2 contacts
Notifications	Parking Impact	Unlimited (Thumbnails + 300 video transfers/month)
	Driving Impact	Unlimited (Thumbnails + 10 video transfers/month)
	Dash Cam Status (Driving/Parked/Power-Off)	✓
	Geo-Fence Entry/Exit Alerts	✓ Up to 5 zones
Remote Access	Dash Cam Power-Off	✓
	Remote Live View	300 mins / month
Send SOS Videos		10 video transfers/month (10 uploads/100 downloads)
Last Parking Location		Unlimited (Parking Images: 1,550 times/month)
My Route (Driving History)		Driving Route History: 30 days
OTA Updates		Firmware & Speed Cam Data
Device Limit Per Account		Up to 30 Dash Cams

# THINKWARE DASH CAM™ Features

## Recording Modes

### Loop Recording

Continuously records and overwrites files on the memory card, starting with the oldest. This ensures you never run out of storage space and always have easy access to your most recent video files.

### Continuous Recording

Activated automatically when you start the engine, this mode saves recorded video in one-minute clips. Enjoy uninterrupted recording without the need for recharging or battery replacement.

### Incident Recording

Equipped with a built-in gyro sensor, our dash cams automatically detect impacts and save footage whether you're driving or parked. The camera captures and stores video starting 10 seconds before a collision is detected, ensuring you never miss critical moments.

### Motion Detection Recording

Automatically starts recording when motion is detected in front of the camera, capturing any activity near your vehicle. It saves a 20-second clip, recording 10 seconds before and 10 seconds after the motion or impact is detected.

### Privacy Recording

Use the 'Privacy Recording' feature to automatically delete recorded files after a specified period, ensuring the protection of others' privacy. Choose between two settings:

- **Strong:** Saves continuous recordings for up to 2 minutes
- **Normal:** Saves continuous recordings for up to 4 minutes

## Advanced Video Clear Technology

### Wide Dynamic Range (WDR)

Ensures balanced exposure and contrast in all environments, capturing clear, detailed footage even in challenging lighting conditions.

### High Dynamic Range (HDR)

Experience enhanced nighttime video quality with Digital Overlap High Dynamic Range (DOL HDR) and advanced Noise Reduction Technology.

### HEVC

Compresses high-resolution video files up to 1.7 times more efficiently than the AVC format, reducing file size without compromising quality.

### Super Night Vision

Thinkware's advanced image signal processing (ISP) technology ensures bright and clear recordings even in low-light conditions.

- **SNV 1.0:** Parking Mode
- **SNV 2.0:** Parking + Continuous
- **SNV 3.0:** Parking + Continuous + HDR
- **SNV 4.0:** Parking + Continuous + Sony Sensor Integration

### Dewarping Technology

Eliminates edge distortions commonly associated with wide-angle lenses, delivering a more accurate and true-to-life image.

# THINKWARE DASH CAM™ Features

## Safety Camera Alerts

### Red Light Cameras

Get notified of red light camera locations as you approach intersections, ensuring you're aware of traffic signals ahead.

### Speed Cameras

Provides real-time alerts for speed camera locations, helping you manage your speed effectively.

## Advanced Driver Assistance Systems (ADAS)

### Front Vehicle Departure Warning (FVDW)

Signals that the vehicle in front of you has started to move when you are at a full stop.

### Front Collision Warning System (FCWS)

Alerts the driver when the following distance between them and the vehicle in front is too close.

### Urban Front Collision Warning System (uFCWS)

Alerts the driver when the following distance between them and the vehicle in front is too close, under 30 km/h in a busy, congested city.

### Lane Departure Warning System (LDWS)

Alerts you if your vehicle begins to drift out of its lane, helping to keep you safely centred on the road.

### Rear Collision Warning (RCW)

Notifies you of any tailgating vehicles within a distance of 5m to 10m for more than 5 seconds.

## Parking Surveillance Modes

### Motion and Impact Detection

When a motion or impact is detected, the built-in gyro sensors automatically trigger recording, capturing 10 seconds before and after the incident.

### Energy Saving

The dash cam enters a low-power standby mode, recording only when an impact is detected. This reduces power consumption, extending Parking Mode coverage up to 3x longer.

### Time Lapse

Records at 1-2 frames per second in Parking Mode for continuous, long-term recording without extra power use.

### Smart Parking

Prevents heat-related damage by automatically switching to low-power mode if the vehicle's interior temperature becomes too high or the battery voltage drops during Parking Mode. In this mode, the dash cam records only impact-triggered incidents & battery drain.

### Radar Parking

The built-in Radar/Radar Module accessory enhances Energy Saving Mode 2.0 by detecting motion before an impact occurs. When motion is detected, the dash cam powers up and prepares to record.
