Before beginning, it is recommended to configure the camera before installation.

1. Download the "SmartLife" mobile application, available for both iOS and Android Devices. On iOS devices, it can be downloaded from the App Store, and for Android, the Play Store.
2. Open the app once it is downloaded. You will be prompted to login, or create a new account if you do not already have one. (Fig. 1)
3. Once you have logged in, select the "Add Device" button. (Fig. 2)
4. Select "Security & Video Surveillance", and select "Smart Camera (Wi-Fi)". (Fig. 3)

5. If you have purchased an SD card (for recording footage), install it in the SD card slot on the camera. (Optional)
6. Connect the camera to the included 5V power supply.
7. Wait until the light on the camera is flashing red. If it does not flash red after 2 minutes, press and hold the Reset button until you hear 3 beeps. The Reset button is located next to the SD Card Slot.
8. Tick the box on screen and select “Next” on the mobile application, to confirm that the light is flashing red. (Fig. 4)
9. Ensure your phone is connected to the Wi-Fi network that the camera will be connected to. Enter the Wi-Fi password of the network the camera will be connecting to, then select “Next”. You may be required to turn on your location settings. (Fig. 5)
10. Hold the QR code that is displayed on the mobile application, up to the camera. Once the camera scans the code, a noise will be heard and the LED on the camera will begin flashing blue. (Fig. 6)
11. Select “I heard a Prompt” on the mobile application. The camera will now get configured, this can take up to 2 minutes. If the camera fails to connect to the mobile application, repeat steps 6 onwards.
12. Select “Done”. The camera will now be connected to the mobile application. (Fig. 7)
13. Using the included mounting bracket, mount the camera to a indoor location.
